Organised by
Department of Zoology

Venue: Dinedevarapadu, kurnool

Date: 27-02-2026

Time: 10:30 am to 01:00 pm

SYNOPSIS

The Department of Zoology organized a study tour to a Prakruthi Poultry Farm located at Dinnedavarapadu, Kurnool On 27th February.2026 , A total of 25 students actively participated in the visit with the aim of providing practical knowledge about poultry management and egg production.

During the tour, students were guided by farm professionals who explained the overall functioning of the poultry farm and different breeds of poultry birds used for egg production. The farm staff demonstrated feeding practices, highlighting the importance of balanced nutrition in improving productivity. Students also learned about egg collection, grading, storage, and marketing processes. . Students observed housing arrangements, including ventilation, lighting, and sanitation practices essential for maintaining bird health.

Special emphasis was given to disease control measures, vaccination schedules, and hygiene practices followed in the farm. The importance of biosecurity measures to prevent infections was also explained.

The interaction session allowed students to clarify their doubts and gain deeper insights into poultry management.. The tour bridged the gap between theoretical knowledge and real-life applications in the field of poultry science.

The study tour was highly informative and beneficial for the students. It provided practical exposure and enriched their understanding of poultry science. Such activities play a vital role in enhancing experiential learning and developing professional skills among students.

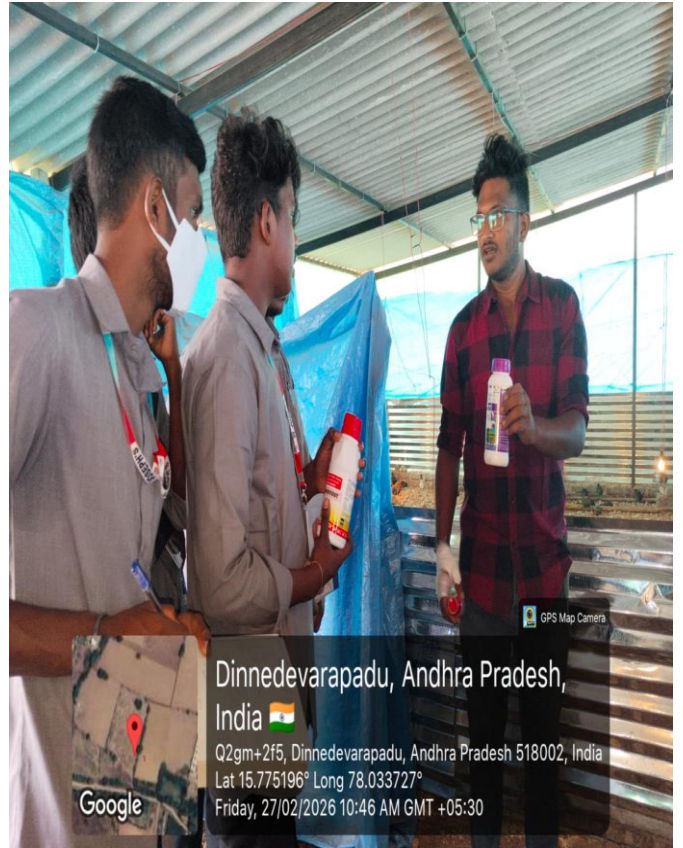

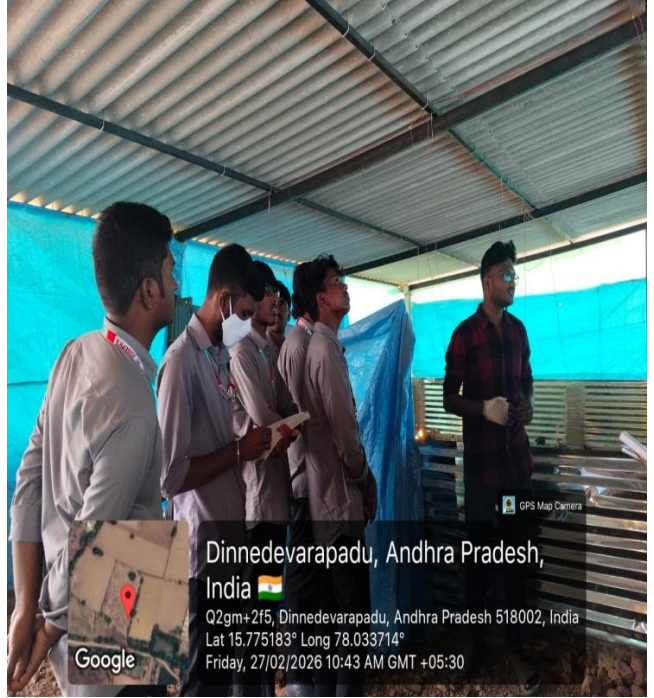

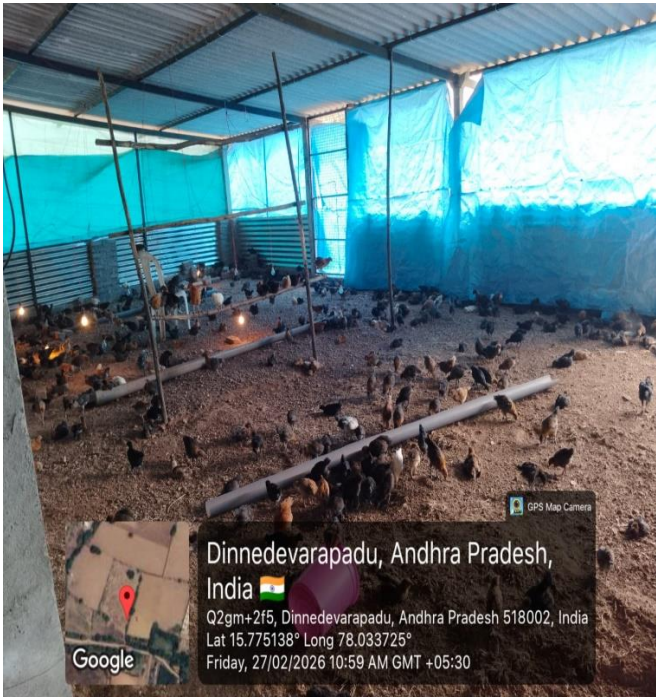

OUTCOMES

- Students gained hands-on knowledge of poultry farm operations.
- Improved understanding of egg production and management practices.
- Awareness of disease control and biosecurity measures.
- Enhanced interest in poultry farming and related career opportunities.
- Better connection between classroom learning and practical application.

OBJECTIVES

- To provide practical exposure to poultry farming practices.
- To understand different poultry housing systems and farm structures.
- To study feeding techniques and nutritional requirements of poultry.
- To observe egg production and handling methods.
- To learn about disease prevention and vaccination in poultry.
- To create awareness about commercial poultry farming as a career option.
